

Declaration of origin of wood raw material

According to the EU's timber regulation, the company must have control over the origin of all wood raw materials.

Derome Timber is FSC® and PEFC certified, which means that the company does not buy raw materials from controversial sources.

All external purchases of timber, wood and forest biomass are made from certified suppliers where the timber raw material originates in Sweden, Norway, Denmark and Finland. Own procurement, i.e. purchases from forest owners, mainly consists of certified suppliers.

The area for own procurement is Skåne, Halland, Kronoberg, Jönköping, Värmland and Västra Götaland counties. The wood consists of spruce (*picea abies*) and pine (*pinus sylvestris*), the forest biomass consists of spruce (*picea abies*) and pine (*pinus sylvestris*), *alnus glutinosa*, *betula verrucosa*, *fagus sylvatica* L, *populus tremula*, *quercus robur*.

Controversial sources

- Illegal logging (without legal right or illegal methods)
- Areas defined as key biotopes
- Forests where civil or customary rights are violated.
- Forests with genetically engineered trees.
- Natural forests that have been felled in order to use the area for plantations or non-forest land use.

This declaration of origin applies to all of Derome Timber AB's, registration number 556550-6960, operations.
